

I am very concerned about the misuse of its broadcasting license by Sinclair Broadcasting.

This company is telling its stations to cancel regular programming and show an anti-Kerry documentary. It will be shown a few days before the election. This timing is obviously intended to influence voters, not to provide information that might have news value to the public.

The FCC should require this station to cancel this programming decision, or provide equal time to an opposing documentary prior to the election and during the same time slot.

Otherwise, this is the type of abuse of its public license that must not be tolerated. Our democracy is at stake, here. Please help protect us all by stopping Sinclair from going forward with this decision.
